www.palomarrcflyers.com

The Palomar Radio Control Flyers Club has been in San Diego County since 1955.

We offer a safe, quiet, and clean hobby for people who love to fly Radio Control Aircraft.

We have been good neighbors at our current field in Fallbrook for twenty years.

Because of a new Community College being constructed, our field will soon be gone!

If you know of open land in North San Diego County that would enjoy hosting a safe and clean hobby, would you let us know?

Landowners that host our club are fully insured, will enjoy a major decrease in vandalism and littering, and will be host to a very popular and community-minded hobby that is attractive to families and friends of all ages.

We would like to extend an invitation to you, your family, and your friends to come visit us at the field and see the wide variety of

exciting Radio Control aircraft that our members fly every day.

While there are members available nearly every day (especially in the mornings), I would recommend stopping by on the weekend when there is the most activity.

If you have ever wanted to explore flying RC aircraft, we offer free flying lessons!

WHAT YOU MUST DO

- Flyer is being emailed to you today
 - Print out, make copies, and distribute
 - Commit to making 5 contacts with people and organizations that might be able to host a field location for our club - that would mean 900 new possibilities!!
-

Act Now Before It's Too Late!
